Turkish Youth!

Your first duty is to preserve and to defend the Turkish independence and the Turkish Republic forever. This is the very foundation of your existence and your future. This foundation is your most precious treasure. In the future, too, there may be malevolent people at home and abroad who will wish to deprive you of this treasure. If some day you are compelled to defend your independence and your republic, you must not tarry to weigh the possibilities and circumstances of the situation before taking up your duty. These possibilities and circumstances may turn out to be extremely unfavourable. The enemies conspiring against your independence and your republic, may have behind them a victory unprecedented in the annals of the world. It may be that, by violence and ruse, all the fortresses of your beloved fatherland may be captured, all its shipyards occupied, all its armies dispersed and every part of the country invaded. And sadder and graver than all these circumstances, those who hold power within the country may be in error, misguided and may even be traitors. Furthermore, they may identify their personal interests with the political designs of the invaders. The country may be impoverished, ruined and exhausted.

Youth of Turkey's future,
Even in such circumstances it is your duty to save the Turkish independence and Republic. You will find the strength you need in your noble blood.

M. Atatürk

MARK ZUCKERBERG: A GENIUS ENTREPRENEUR

On May 14th, 1984, Mark Zuckerberg was born in the small White Plains town, in New York. He was the fourth child of his parents. Mark began writing software and using computers when he was in middle school. With the help of his father, his coding experience began at the age of six. He learned Atari basic programming. His father initially introduced the computer language to the young boy. Mark was learning so fast that later his father needed to hire a professional developer to tutor him. He built a messaging program called Zucknet for his father's dental office. During his Harvard University years, he was already known as a "programming genius". In 2004, he began writing a new website which he called Facebook. This social project started gaining momentum really fast and Zuckerberg decided to drop out of college and dedicate his time entirely to the site.

In 2010, The Time magazine named Zuckerberg among the 100 wealthiest and most influential people in the world. His net worth is estimated at $54,78 billion in 2016 and currently, he is the CEO (Chief Executive Officer) of the social networking company. There is no doubt that Facebook has changed the way we communicate online and today, it remains a very popular site thanks to this young entrepreneur.

14 **Answer the questions below according to the given passage.**

1. When did Mark start to write software?

_____

2. Who helped him when he was a child?

_____

3. Why did he need a professional tutor?

_____

4. What did Mark do in 2004?

_____

5. How was his success seen by the press?

_____

6. How has Facebook affected today's lifestyle?

_____

15 **Read the passage again and write True (T) or False (F) for the given sentences.**

1. Mark was the only child of his parents.
2. When he was in middle school, he began using computer and writing software.
3. After he graduated from Harvard University, he was known as a genius programmer.
4. The Time magazine ranked him among the top ten wealthiest people in 2016.
5. When he was only six, his father introduced him to the computer language.
6. Mark is the CEO of the social network, Facebook now.
7. Facebook has left its popularity and value in recent years.

16 Read Martin's letter of intent. Then, complete his CV for the programming company.

Richard Wilson
Director of Human Resources, TechnoJoy Co.

Dear Mr. Wilson,

My name is Martin Foster and I'm writing to you to apply for the position of computer programmer posted on your website on May 31.

I believe I would be a perfect fit for this position because I have got three years of professional experience as a computer programmer and operator.

I graduated with a Bachelor's in Software Engineering from Manchester University in 2016 and went on to a Masters Program of Computer Science on mobile systems. Programming and designing are my special interests. Since graduation, I have worked in the programming and designing departments of a few companies such as Fly Mobile, Galaxy Store, and Summit Software. My recent position, as a head of programmers' team at Summit Software Company, gave me a great deal of experience. I was charged with producing the applications and small games for mobile phones and tablets. I organized and led the project team successfully. My projects which I worked on during my career there contributed a lot to the company's strategies and increased the sales. I built relationships with many other designers and programmers while I was at Summit Software. Although I loved my time there and will greatly value the skills I learned, I feel it's time to embark on a new adventure.

If you would like to discuss my qualifications further, please, do not hesitate to call me at (562) 488- 5690. I can also be reached by e-mail at martin@intentletter.com

Best regards

Turkish Youth!

Your first duty is to preserve and to defend the Turkish independence and the Turkish Republic forever.
This is the very foundation of your existence and your future. This foundation is your most precious treasure. In the future, too, there may be malevolent people at home and abroad who will wish to deprive you of this treasure. If some day you are compelled to defend your independence and your republic, you must not tarry to weigh the possibilities and circumstances of the situation before taking up your duty. These possibilities and circumstances may turn out to be extremely unfavourable. The enemies conspiring against your independence and your republic, may have behind them a victory unprecedented in the annals of the world. It may be that, by violence and ruse, all the fortresses of your beloved fatherland may be captured, all its shipyards occupied, all its armies dispersed and every part of the country invaded. And sadder and graver than all these circumstances, those who hold power within the country may be in error, misguided and may even be traitors. Furthermore, they may identify their personal interests with the political designs of the invaders. The country may be impoverished, ruined and exhausted.

Youth of Turkey's future,
Even in such circumstances it is your duty to save the Turkish independence and Republic. You will find the strength you need in your noble blood.

My Job

Hello! I'm Stacy. I'm from Holland and I'm an 11th grade high school student. I'm a person of taking risks and doing research and experiments. I'm also very interested in science, so I searched about the fastest growing occupations to be able to find a future job in healthcare and I learnt about many future positions in careers. I got really attracted by the job called biotechnologist. It is a science which works to improve the quality of human life by studying the genetic, chemical and physical attributes of cells. Then it tries to develop new technologies, products and processes. It really caught me more when I read about Nina Tandon who became not only a great scientist but also a great CEO. She is the co-founder of EpiBone and this company grows human bones from stem cells taken from patients. They grow the bones in the shape and size required for the implantation to the body. It's really amazing. I think I will be studying biotechnology two years later.

- ☐ 1. Stacy is keen on doing research and experiments.
- ☐ 2. She wants to find a job in healthcare in the future.
- ☐ 3. Biotechnologists don't improve products for human life.
- ☐ 4. EpiBone is a company which produces human bones from stem cells.
